CORVETTE STARTUP ACCELERATOR

A uniquely Bowling Green Approach to
Growth

WHAT'S GREAT ABOUT BG?

A lot! ...but a few things stand out.

Bowling Green, KY offers a plentiful and unique variety of resources and economic opportunity for technology and other industries alike. Situated in the heart of South-Central Kentucky, Bowling Green offers close proximity to a variety of larger cities including Nashville and Louisville without sacrificing cost-of-living and other associated conveniences. With the additional support of local institutions like WKU and the affiliated Small Business Accelerator, BG not only provides an eager and skilled workforce, but the tools necessary to foster innovation and entrepreneurship.

CORVETTE CULTURE

People come to experience the cars every day

With the presence of Beech Bend Raceway, hosted events like LS Fest East and Import Alliance bring in ~100k annually for the sake of car culture. Additionally, the presence of automotive innovators like Holley make BG extremely desirable to enthusiasts across the country.

However, there's one car BG loves in particular

Although BG is home to a variety of car-related events, businesses, and activities, the most notable of these is the Corvette Museum and Manufacturing Plant. Since relocation in 1981, Bowling Green has remained the only producer of the extremely popular sports car for over four decades, drawing in a plethora of folks who wish to explore, and potentially buy, these marvels of the automotive industry.

CORVETTE STARTUP ACCELERATOR

**Revenue generating startup hub that centers BG
as a center of innovation**

Prospective startups apply to work with us on the condition that they implement their tech with our cars first. This draws in new tech companies and furnishes us with a fleet of one-off vehicles with cutting edge advancements car enthusiasts will love.

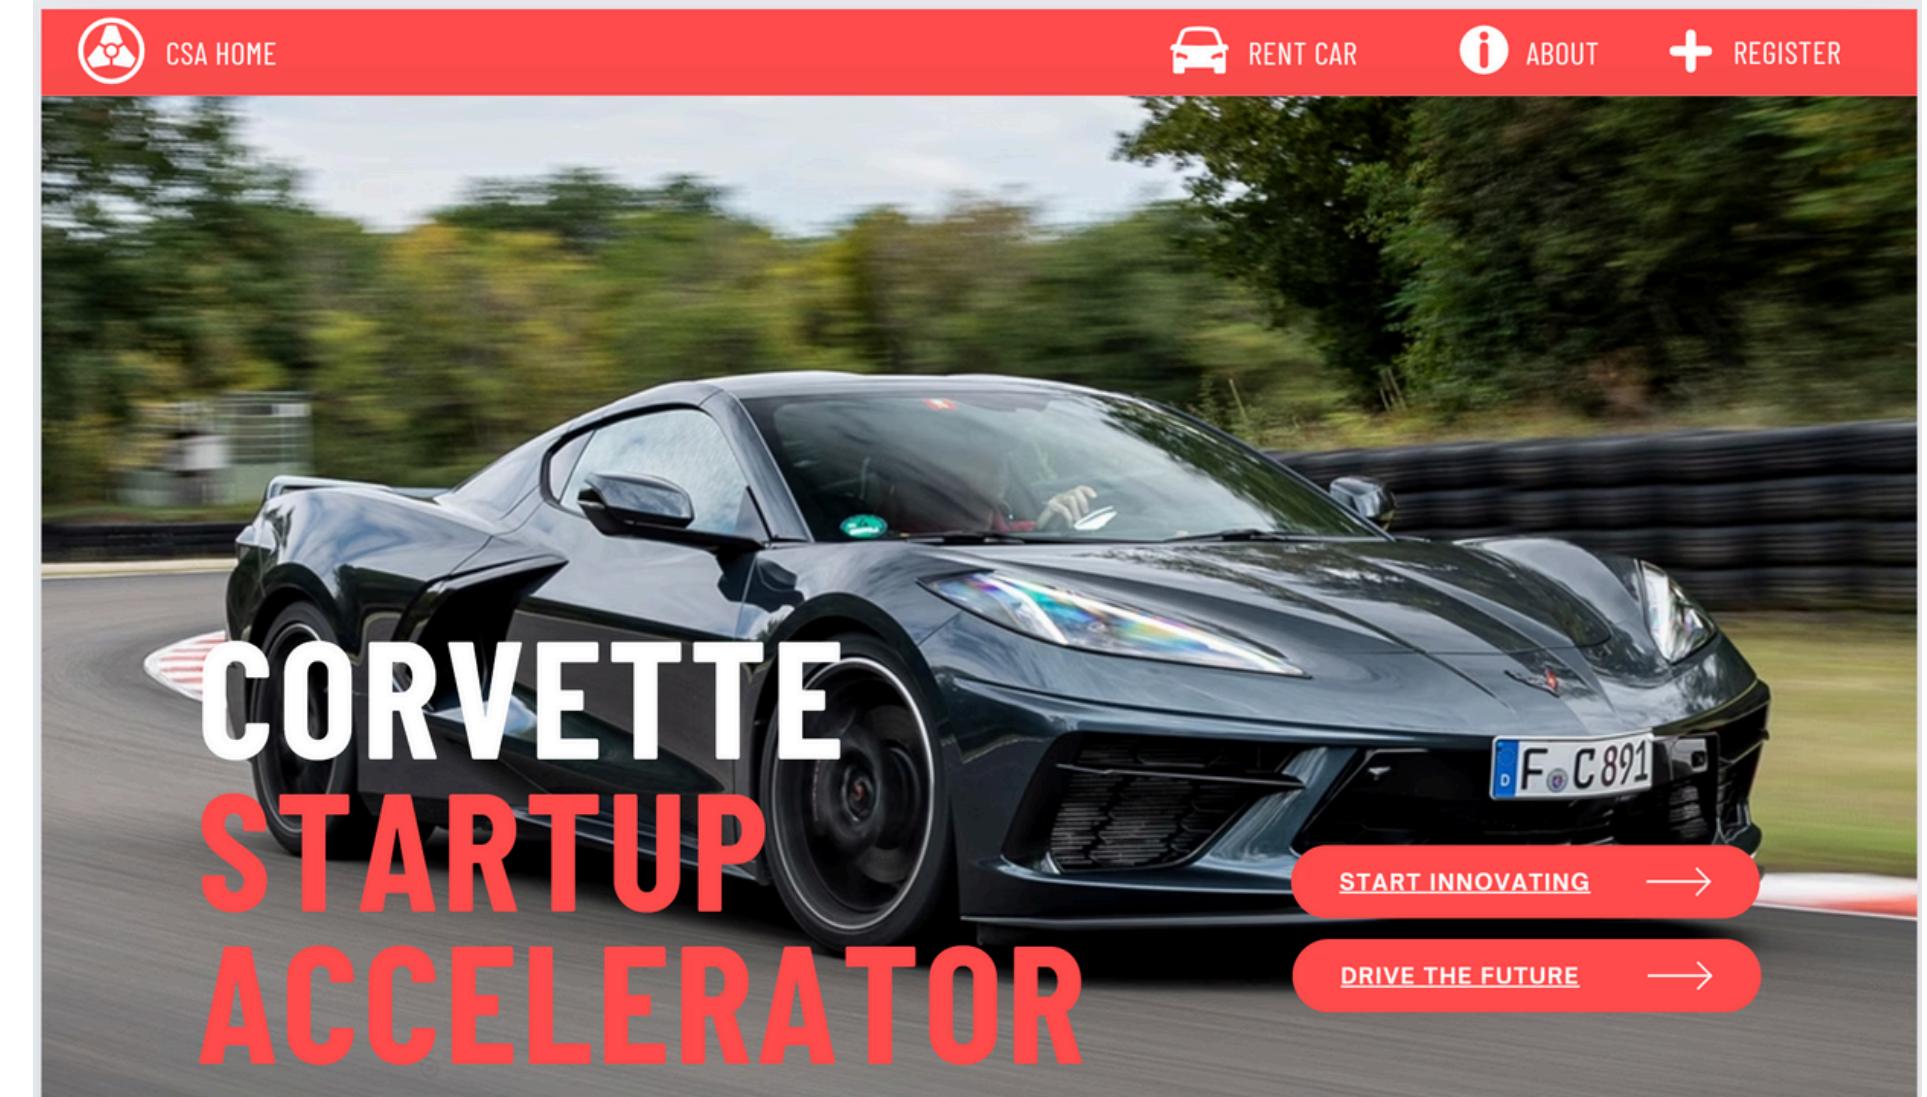

We offer startups resources, and they prototype their tech into our fleet of cutting edge corvettes.

WEBSITE

Marketing to prospective startups and prospective renters

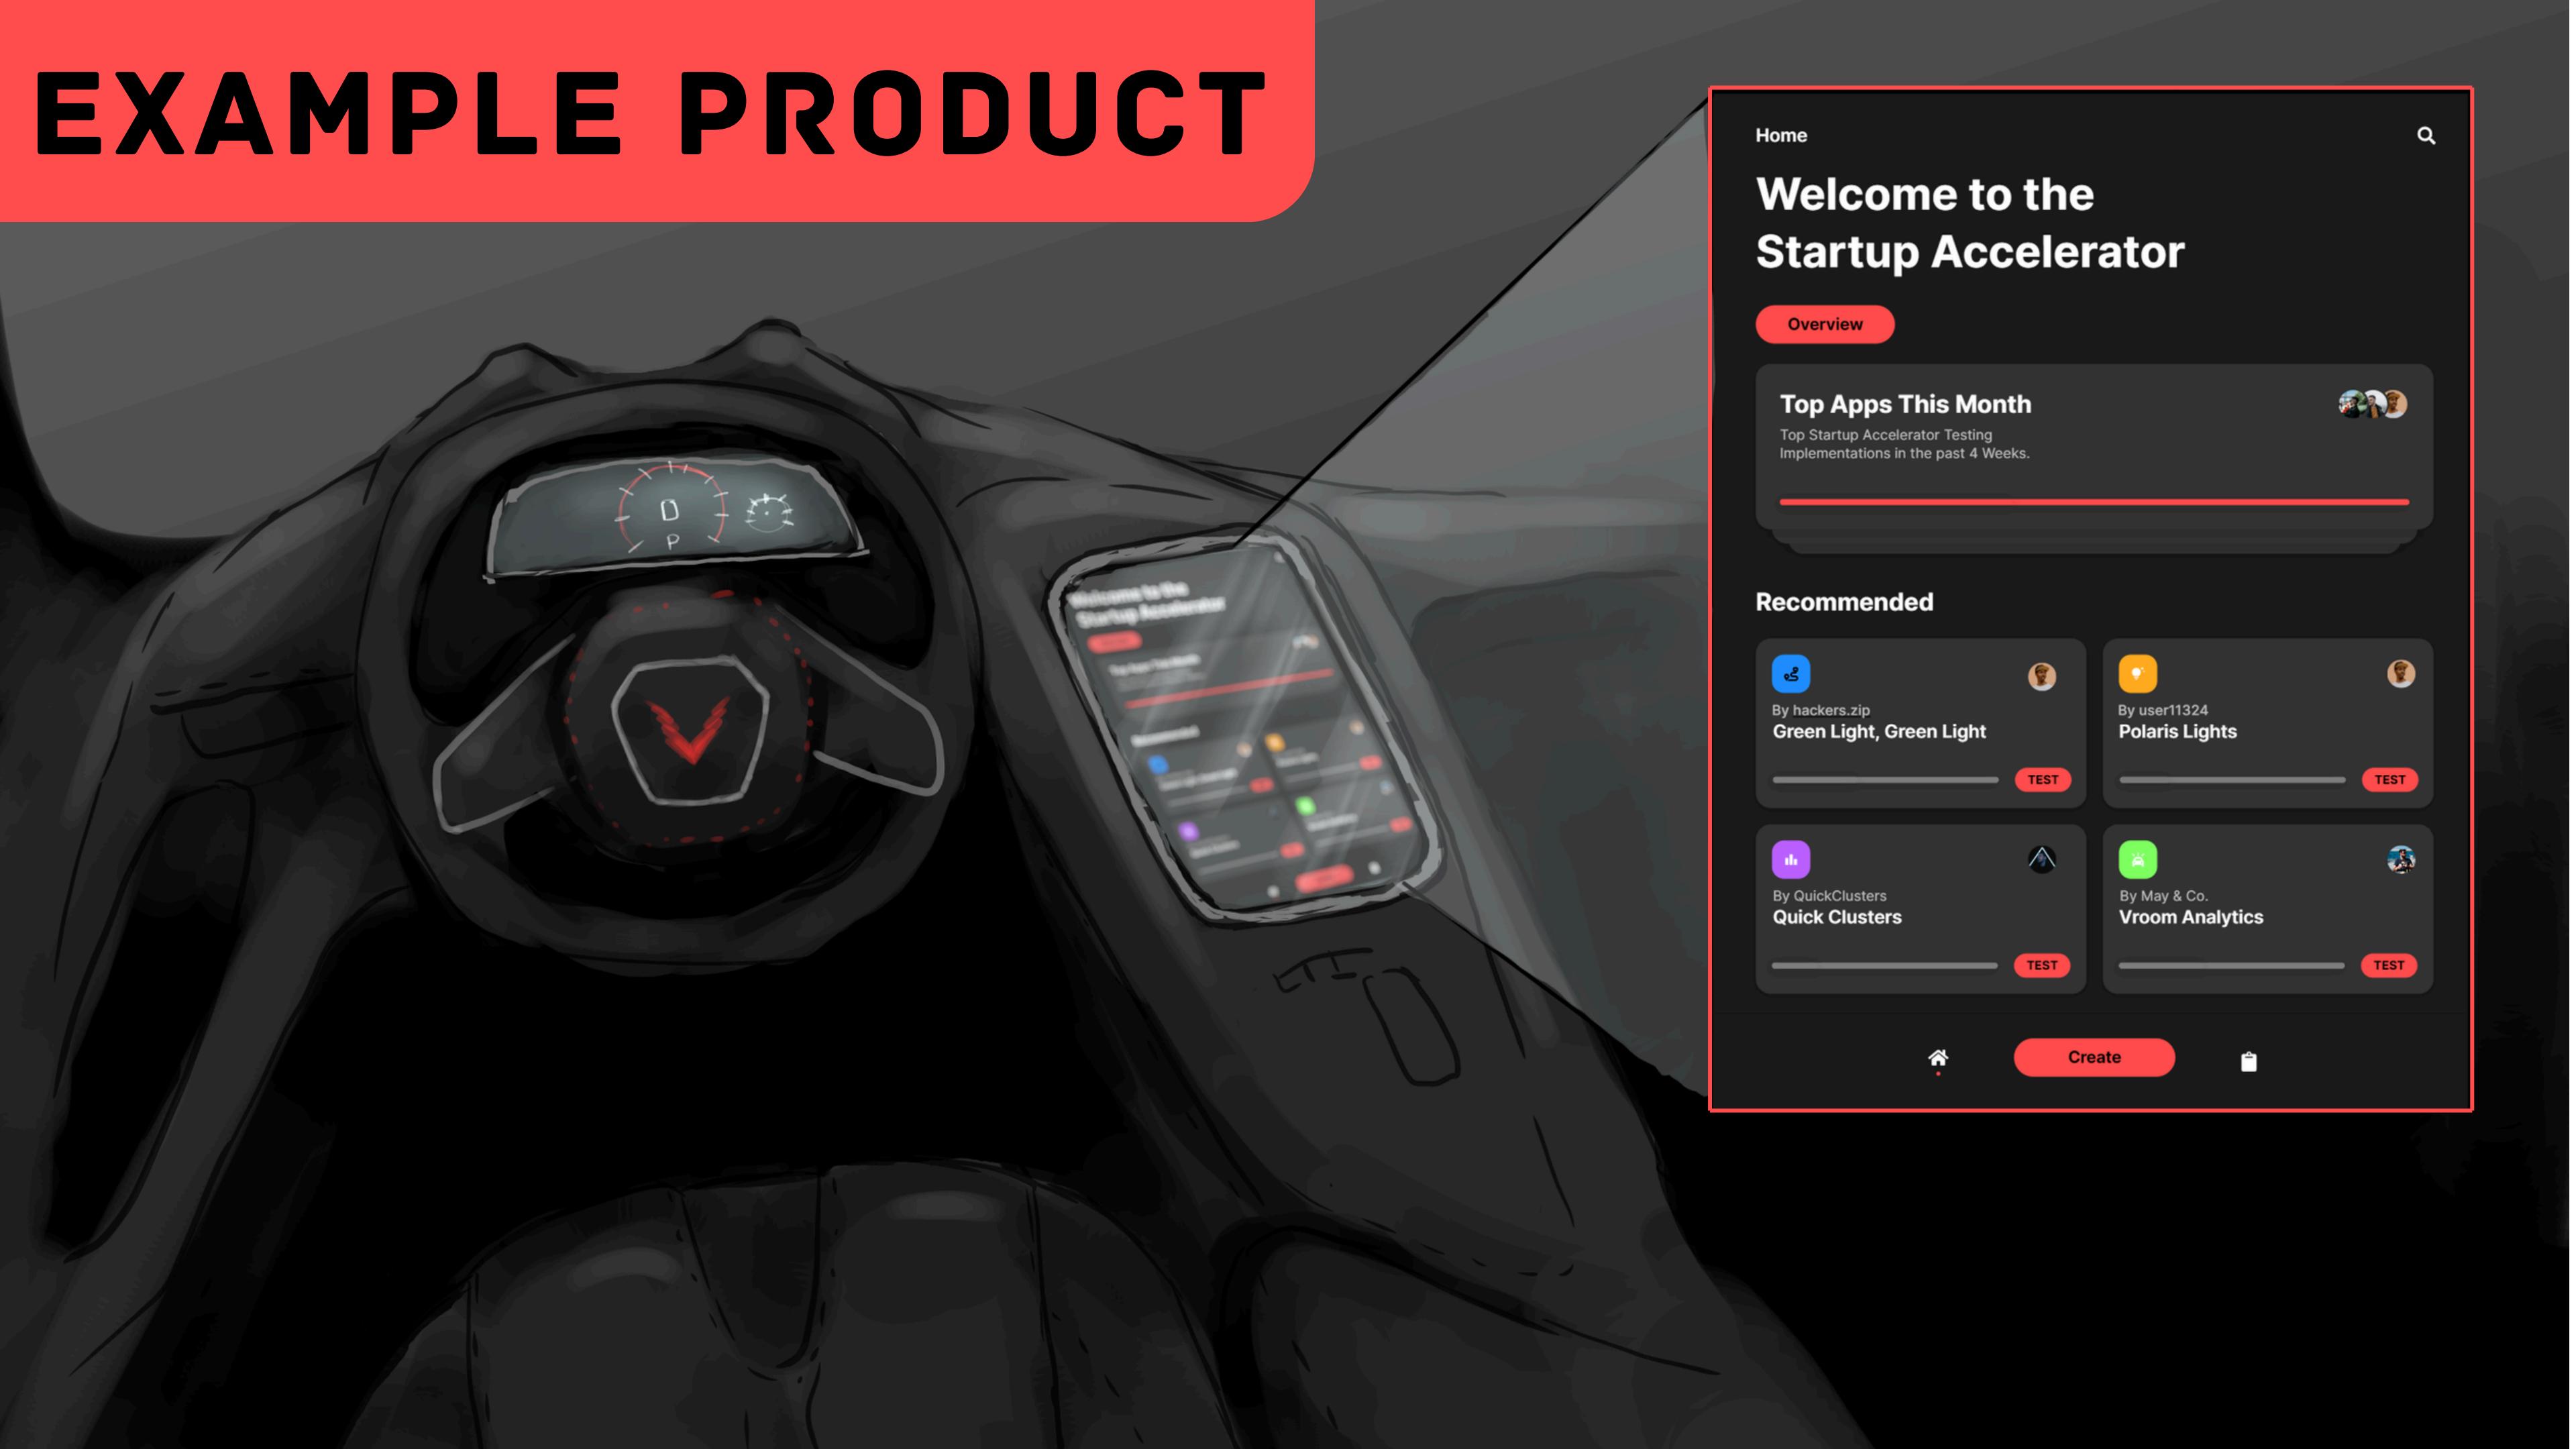

Our website explains what our program is all about, including pages where developers and startups can submit their ideas to test in our unique Corvette interface.
